

## PRODUCTION OF HIGH QUALITY ELECTRICAL CABINETS

EVROTEHNA d.o.o. was founded in 2000 as a retailer of electrical goods and accessories and registered as a Ltd. Company in 2007 when it started producing electrical and rack cabinets and additional equipment. In addition to the production and sales of the equipment, the company also offers equipment servicing. EVROTEHNA products are sold in Serbia as well as international markets.

To expand and increase the quality of its production, the company invested in a CNC Hydraulic Press, which allows for more precise bending of materials and reduces waste during the production process. The new equipment has photocell protection of the bending zone and mechanical safety barriers. With the new equipment, the company can increase its export activities, but also provide safer working conditions for the operators of the machine.

The project was financed using the simple LET process, which is based on a list of (eligible) pre-approved equipment and shortcuts the technical assessment process. The current list of eligible technologies includes hundreds of individual items for investors to choose from and the list is continuously expanded with new technologies.

After the successful project verification, EVROTEHNICA received a 15% grant cash-back, funded by the European Union.

With the investment, the company now meets a wide variety of standards, including:

- Directive 2006/42/EC on machinery
- Directive 2014/35/EU on the Harmonization of the Laws of Member States relating to Electrical Equipment Designed for Use within Certain Voltage Limits

<b>Loan Amount</b>	€ 52,900
<b>Grant amount</b>	€ 7,953
<b>EU Directives met</b>	Machinery and electrical equipment
<b>Invested in</b>	CNC Hydraulic Press
